I. COMPANY OVERVIEW

Agilead Consulting LLC is a Texas-based management consultancy providing program and project management, program evaluation, information governance, and electronic records management. The firm supports requirements definition, business process improvement, and business design, with project management focused on budget and schedule guidelines. Additional services include process and logistics consulting and computer training for organizations managing complex projects, processes, and information.

II. CORE COMPETENCIES

01 Program & Project Management
Planning, coordination, stakeholder engagement, risk management, and schedule oversight.

02 Program Evaluation & Review
Assessment of program objectives, performance, outcomes, and improvement opportunities.

03 Information Governance
Information lifecycle, retention schedules, records disposition, and governance frameworks.

04 Electronic Records Management
Digital records processes, e-discovery readiness, and litigation hold support.

05 Requirements & Business Design
Requirements definition, business analysis, and process improvement activities.

06 Logistics Consulting
Process, physical distribution, and operational logistics advisory services.

07 Computer & IT Training
Technology training and end-user support for implementing business processes and systems.

III. DIFFERENTIATORS
